

## Ameripolish® EZ-Kut Grinding Agent

Ameripolish® EZ-Kut Grinding Agent is a water based, pretreatment, rapid surface preparation agent used for the initial cut on hard, dense concrete and helps with exposing large aggregate faster than dry only or standard wet methods. EZ-Kut also helps by dramatically increasing the productivity of lower-grit diamond tooling. EZ-Kut Grinding Agent achieves this by suspending concrete solids away from the surface for diamond tools to achieve maximum efficiency. This then shortens the project time-line, reduces labor costs and extends the life of diamond tooling. EZ-Kut is also unique in that it can be used in wet and dry grinding methods.
