

Husqvarna DM 220

Ergonomically designed handheld machine for both dry and wet drilling. The DM 220 is equipped with a new level guidance system for vertical, horizontal or angled drilling, which increases precision and makes you more efficient. It's perfect for professionals as well as less experienced users.

ADJUSTABLE HANDLE

The front handle can be turned 360 degrees, which is useful when you're drilling in cramped areas.

ELGARD™

Equipped with Elgard™, the machine uses pulsation to warn you of an approaching overload. This extends product life.

GUIDANCE FOR EXACT DRILLING

A LED indicator shows when the machine is in preferred vertical, horizontal or angled position. This provides more efficient drilling.

WET AND DRY DRILLING

A three-way valve enables both dry and wet drilling.

Features Husqvarna DM 220

- Adapted to all types of users - from beginners to professionals.
- Has a new level guiding system that guides the operator, increases precision, and provides more efficient drilling.
- The machine's front handle can be turned 360 degrees, which is useful when drilling in cramped areas.
- LED indicator shows when the machine is in vertical or horizontal position. It's also possible to calibrate the system to receive guidance for angled drilling.
- Equipped with Elgard™, which uses pulsation to indicate when the machine is overloaded. This extends product life.
- When making a starter hole, speed can be reduced by half using SmartStart™.
- Built-in SoftStart™ - electronic current limiter means full speed is reached about two seconds after start.

TECHNICAL SPECIFICATION	
1-phase rated voltage	230/115 V
Rated current, A	15 A
Power	1850 W
Phases	1
Speeds	3
Spindle speed full load	580/1400/2900 rpm
Max drill bit diameter, handheld	3 inch
Max drill bit diameter, stand	6 inch
Mounting collar	2.36 "
Spindle thread, outer	1-1/4"
Spindle thread, inner	1/2"
Weight	12 lbs
Sound pressure	90 dB(A)
Sound level	94 dB(A)
Power rating	1100 W
