

EZ PREP Series

- Coating removal

Our EZ PREP tools are specifically developed for removal of thinner coatings and for concrete surface levelling. Thanks to their versatility they are a safe first-hand choice for most occasions. They are also good choice if you would like to generate a structured surface with good adhesiveness when casting a floor, no matter if its on top of screed or concrete.

EZ PREP 0

- Item Number: 213343-0

PREP0 is a versatile aggressive tool for removal of coatings 0-2mm, such as screed, paint, glue, epoxy. Works very well on both hard surfaces and abraasive uneven surfaces.

EZ PREP H1

- Item Number: 213344-1

For concrete surface levelling or removal of coatings 0-1mm, such as screed, paint, glue, epoxy. PREP H1 is specifically designed for hard concrete.
