

Introducing...the Gabion Fire Pit

Every bit as functional as it is aesthetically pleasing...

Offer your clients this fire pit to add a luxurious feel and welcoming ambience to any backyard or patio. With its smoke, odor and ash-free features, this fire pit provides warmth and light for outdoor social gatherings.

The classic square shape table surface of the Teton Fire Pit is laid with a fashionable Smoke Grey granite top and complimented with a solid glass-filled gabion base. A one piece burner pumps out 150,000 BTUs of heat, allowing for an extended outdoor entertaining season, even into the chilly autumn months. A simple T-valve controls the gas flow with a quick spark ignition push button, making the Teton a perfect and easy-to-use addition to any patio.
