- **Weight:** 3 lbs
- **Purpose:** Hone

ENGINEERED DESIGN

- The RSP Q8 Trac PCD is one of the most aggressive tools offered in the Q8 line
- Available in left or right alignment
- Designed to remove material quickly and if you want to reapply epoxy or another coating
- The wear bar is in front of the PCD instead of behind, lessening the impact on the PCD while still allowing the PCD to do its job, ripping through material
- The bar design ensures the PCD does not gouge or dig into the floor, maintaining a constant cutting depth
