

WINTER IS TOUGH ON CONCRETE

Protect it with Saltguard®

Repel water and provide a salt screen for horizontal and vertical concrete and masonry. Prevent the attack of corrosive water and water-carried de-icing salts.

APPLY

Ready to apply-No mixing. Treat horizontal and vertical concrete and masonry, including concrete block, clay and concrete brick surfaces. Average service life of treatment is up to 10 years.

PROTECT

Saltguard® protects surfaces from moisture intrusion and chemical attacks of chloride salts, reducing rebar corrosion and surface spalling.

ENDURE

Treated surfaces "breathe", they do not trap moisture. Saltguard® also helps prevent and protect against deep-seated, waterborne contaminant staining.
