

S210E

Streamer with inline separation

Description

The STREAMER S210E by Von Arx is the world's first mobile blast machine featuring the innovative "Inline Separation system", doubling blasting capacity compared to previous machines running on single-phase 230V and 110V A.C. Its compact and durable design makes it easy to maneuver in tight spaces, ideal for shotblasting small to medium concrete and asphalt surfaces, including walkways, garages, and stairs.

Technical data

Power	230V, 50 Hz / 110V, 60Hz, 1-phase
Working width	20 cm / 8"
Weight	50 Kg / 110 lbs
Traction	Manual
Capacity	40m ² /h / 430sqf/h
Hose connection	50mm / 2"

Pairs with

Dust extractor **S2**

Key features

Inline-Separation.

Height adjustable lever, with integrated control elements.

Extremely easy handling.
